

1. **Office files to PDF Converter:** The app supports both old and new Office file format extensions, including DOC, DOCX, XLS, XLSX, PPT, and PPTX.
2. **JPG to PDF:** You can upload multiple JPEG's and combine them into a single PDF. It's also possible to adjust orientation and margins.
3. **HTML to PDF:** Copy and paste the URL of the page you want and convert it to PDF with a click. The quality remains the same on conversion.
4. **PDF to Office Files:** Convert your PDF files into editable documents. PDFBear uses the **Solid Documents Framework** for converting files.
5. **PDF to Image Files:** Convert each PDF into an image or extract all the images contained in a PDF. You can save the pictures to your computer.
6. **Merge and Split PDF:** PDFBear lets you combine multiple PDFs in any desired order from the browser. If the document is huge, you can choose the pages and export them into individual PDF's.
7. **Compress PDF:** Reduce the size of your PDF online so that you can share them easily. There is an option to select your compression level.
8. **Repair PDF:** Repair a damaged PDF and recover data from it. The built-in PDF Repair kit tries its best to recover and repair the file, but there is no 100 percent guarantee.
9. **Add Watermark:** Stamp an image or text over your PDF in seconds. You can even customize the typography and transparency of the watermark as you need.
10. **eSign PDF:** PDFBear makes it simple to sign your document. Create your signature, sign the PDF, and request people to sign. Several options are available for creating a signature.
